Plans for a Flight Software V&V Workshop
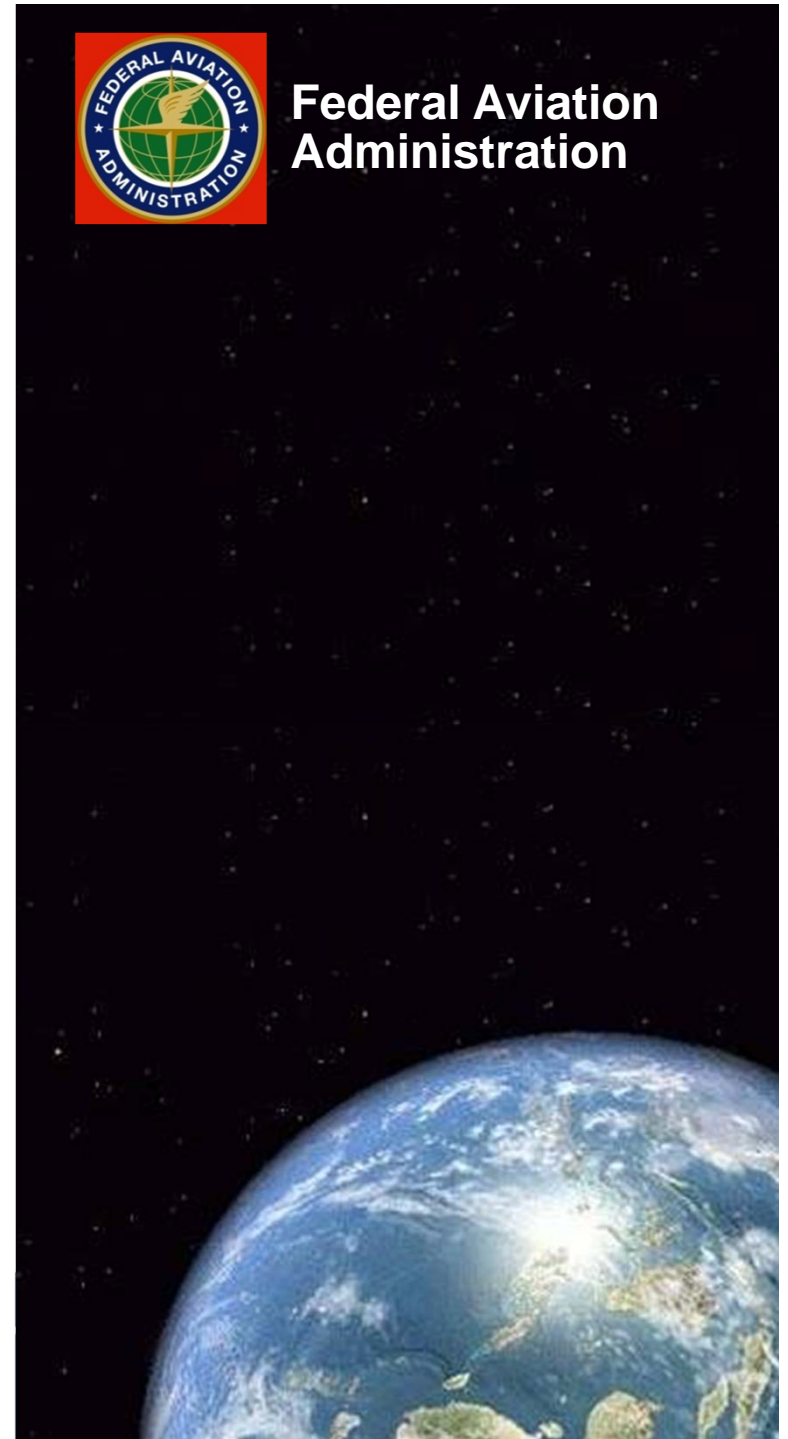

Federal Aviation Administration

Juan J. Alonso
**Department of Aeronautics & Astronautics
Stanford University**

**FAA COE for CST Technical Meeting
Boulder, CO**

November 9, 2011

Overview

- This is a minor task that, at the moment, includes no research or graduate students

- Flight software V&V was identified as a critical technology to improve safety and reduce costs

- Outcome of this effort is meant to be a workshop to outline a plan of research in this area

- The intent is to hold this workshop during the early Spring of 2012

Overview

- Initial contacts with NASA, Industry, Academe are helping generate:
  - A database of possible participants
  - A short number of presentations
  - An agenda for the workshop

- Your help in identifying all relevant parties is greatly appreciated.

- Possibility of adding the output of workshop to roadmapping activity sublevels?
